

PROJECT PLAN

Project title: LINKEDIN LOCAL BAMENDA

1. Introduction

The LinkedIn local Bamenda is a project which focuses on organizing and hosting an onsite event themed “Beyond the profile.” The event aims to explore how individuals, brands, and organizations can move past simply being seen to creating meaningful impact, influence, and lasting value in their respective fields. Our society indeed needs more transformers and that is why we are here.

The primary goal of this project is to deliver an engaging and insightful physical event that equips participants with practical strategies for building authenticity, credibility, and deeper audience connection. It also seeks to foster meaningful conversations, encourage personal and professional growth, and position the event as a platform for thought leadership and knowledge sharing.

Ultimately, the project intends to achieve measurable outcomes such as strong participant engagement, increased awareness of the theme, and actionable takeaways that attendees can apply beyond the session.

We will be joined by speakers around the country who will help make these achievements a reality.
